Professional Summary

High-performing Computer Science undergraduate and 5x Technical Intern with hands-on experience in software development, machine learning, and full-stack web technologies through structured internships and project-based learning. Proficient in Python, Java, C, and JavaScript, with strong foundations in data structures, algorithms, object-oriented programming, and scalable application development. Experienced in building real-world applications, leading teams, and implementing AI/ML and cybersecurity solutions. Adaptable, collaborative, and results-driven, with a demonstrated ability to learn quickly, write clean, maintainable code, and contribute effectively to high-impact engineering projects.

Skills Summary

- **Programming Languages:** Python, Java, C, JavaScript, HTML, CSS, SQL, Shell Scripting
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Basic Operating Systems & DBMS concepts
- **Frameworks & Libraries:** React.js, Bootstrap, Spring Boot, TensorFlow, NumPy, OpenCV
- **Tools & Technologies:** Git & GitHub, Linux/Unix Shell, VS Code, Streamlit, Overleaf
- **Software Development Skills:** Debugging, Code Optimization, Version Control, Writing Clean & Maintainable Code, Team Collaboration, Analytical Thinking, Problem Solving, Critical Thinking
- **Areas of Interest:** Software Engineering, Frontend Development, AI/ML, Computer Vision, Cloud, Cybersecurity, Blockchain
- **Professional Skills:** Strong Communication, Teamwork, Leadership, Time Management, Adaptability
- **Languages:** English (Fluent), Hindi (Fluent), Malayalam (Fluent), Spanish (Basic)

Education

Christ College Of Engineering, Irinjalakuda, Thrissur, Kerala, India *Sept 2024 – Present*
B.Tech. Computer Science & Engineering
- CGPA: 9.91/10
- **Coursework:** Python, C, Java, Software Engineering, Data Structures & Algorithms, COA, Operating Systems, DBMS
- **Activities & Societies:** Website Team, Newsletter Team, Magazine Team, Outreach Team, FOSS, English Club, Speech Club, TinkerHub, Design Team (TinkerHub), Technical Lead (CODe), Game Development Club, NDLI Club

Bharatiya Vidya Bhavans, Poochaty, Thrissur, Kerala, India *April 2023 – April 2024*
- 12th Percentage: 96.8%
- Coursework: English, Physics, Chemistry, Mathematics, Biology

Indian School Darsait, Muscat, Oman *April 2010 – April 2023*
- 10th Percentage: 96.6%

Experience

AI ML Intern & Data Visualization Intern *Remote*
Infosys Springboard Virtual Internship 6.0, 7.0 *Dec 2025, July 2026*
- Attended mentor led session on Agile methodologies and GitHub
- Developed Fitplan.ai, performing documentation, integration, testing, backend development, visualization, data preprocessing.
- Served as temporary Team Lead of project group
- Building Building Hospital Dashboard system (7.0)

AI ML Intern *Onsite*
Summer Internship Program'26 @ Government Engineering College, Thrissur *June 2026*
- Built LucraLens AI, an ML-powered compensation intelligence engine using Python, Pandas, NumPy, Scikit-learn, and Random Forest Regression to perform salary prediction through data preprocessing, feature engineering, model evaluation, and Streamlit deployment.

Cybersecurity Intern – Internship *Remote*
Vodafone and VOIS Idea Foundation in partnership with Edunet Foundation & AICTE *Dec 2025*
- Developing a keylogger application and AI Network Intrusion System as part of hands-on cybersecurity training to understand system vulnerabilities.
- Strengthening core cybersecurity fundamentals using Kali Linux and VirtualBox.
- Completing coursework and guided modules in cybersecurity to reinforce practical skills and theoretical understanding.

Frontend & Web Development Intern - Internship *Remote*
IBM SkillsBuild Internship Programme in partnership with Edunet Foundation & AICTE *Aug 2025*
- Gained hands-on experience with HTML, CSS, JavaScript, responsive design and clean coding practices.
- Developed a fully functional Quiz Application as a final project, applying real-world UI/UX and frontend development concepts.

Artificial Intelligence & Machine Learning – Internship *Remote*
Shell in partnership with Edunet Foundation & AICTE *July 2025*
- Applied data analytics and AI models to sustainability-driven problem statements and environmental use cases.
- Designed and implemented a Deforestation Detection System using ML, aligned with Sustainable Development Goals (SDGs).

Artificial Intelligence & Machine Learning Intern - Internship *Remote*
IBM SkillsBuild Internship Programme in partnership with Edunet Foundation & AICTE *June 2025*
- Gained hands-on experience in data preprocessing, model training, and evaluation.
- Designed and implemented an Employee Salary Prediction System using ML techniques.

Foundations of Artificial Intelligence - Internship *Remote*
Microsoft in partnership with Edunet Foundation & AICTE *April 2025*
- Built and evaluated supervised and unsupervised ML models, including regression and classification.
- Applied computer vision and Generative AI concepts using Azure Custom Vision in hands-on labs.
- Developed an AI-based chatbot as a capstone project using neural network and deep learning fundamentals.

Projects

Pharmacy Management System *In Progress*
- Building a DBMS-based system for managing medicine inventory, sales, and supplier records.
- Designing relational schema and implementing SQL queries for data storage and retrieval.

Cache Performance Analysis using Ripes *Mar 2026*
- Simulated cache performance using Ripes by implementing sequential, loop-intensive, random memory access programs.
- Evaluated LRU and Random replacement policies, analyzed cache hits, misses, hit rate, CPI, EMAT.

Pocket Plans – AI Travel Roadmap Generator *Feb 2026*
- Developed using Python and FastAPI, creates optimized travel plans based on user mood, location, and available time.
- Integrated Geoapify Places API and OpenWeatherMap API to analyze nearby locations, weather conditions, and ratings.
- Implemented scoring algorithm to sequence destinations, allocate time per stop, generate Google Maps navigation links.

AI Network Intrusion System *Jan 2026*
- Built using Python, Scikit-learn (Random Forest), Streamlit, Hugging Face models/APIs for AI-driven attack explanation.

Keylogger Application *Dec 2025*
- Built using Python, uses the pynput library to capture keyboard events and the built-in json module to store recorded keystrokes.

FoodHub: A Smart Restaurant Ordering System *Oct 2025*
- Led task planning, role assignment, and development workflow within the team.
- Built and integrated frontend and backend using Java Spring Boot, Spring Web, Thymeleaf, REST APIs, and Postman.
- Supported debugging, code review, and overall system quality and usability.

Harry Potter Invisibility Cloak *Sep 2025*
- Implemented a real-time invisibility cloak using Python, OpenCV, and NumPy based on computer vision techniques.
- Applied color detection, masking, and background replacement for live video processing.
- Strengthened skills in image processing, debugging, and real-time computer vision workflows.

Deforestation Detection System (MODIS Satellite Data) *Aug 2025*
- Designed an AI-driven system to detect deforestation using MODIS satellite data for environmental monitoring.
- Performed data preprocessing, feature extraction, and classification using Python, Pandas, NumPy, and Scikit-learn.
- Demonstrated application of machine learning models for sustainability-focused and SDG-aligned solutions.

Employee Salary Prediction System *Jul 2025*
- Developed a machine learning-based web application to predict employee salaries using Python, Pandas, NumPy, Scikit-learn.
- Built an interactive Streamlit interface enabling real-time predictions based on experience, education level, and job role.
- Applied data preprocessing, model training, evaluation, and deployment concepts for HR analytics use cases.

NoteVerse – Notes App *May 2025*
- Developed a clean, user-friendly web-based notes application using HTML, CSS, and JavaScript.
- Implemented core features including create, edit, delete notes, and task tracking functionality.
- Focused on responsive UI/UX design, clean code structure, and usability.

Wireless Power Transfer *Nov 2024*
- Designed and implemented a wireless power transfer system using inductive coupling for contactless energy transfer.
- Optimized power transmission efficiency while minimizing energy loss for real-world smart-device applications
- Explored sustainable energy solutions and future use cases including wireless charging and IoT integration.

Achievements & Activities

- Filed Indian Patent (Application No. 202641048328) for "Guardian Wing: Collaborative Fleet Intelligence System" — April 2026
- First Runners Up, Pension Fund Regulatory and Development Authority Hackathon, IIT Kanpur — March 2026
- Event Coordinator, Perception vs Potential, Invited Talk — March 2026
- Participant, Tink-Her-Hack — Feb 2026
- Event Coordinator, IMMERSIVEA '26 - VR Simulation Event — Feb 2026
- Participant, Ocean Panel, BEACHHACK SEASON 7 — Jan 2026
- Participant, SpaceUp Unconference, CUSAT — Jan 2026
- Winner, SYNAPSE Debate Competition — Jan 2026
- Event Coordinator, Tech Bingo, VidGenesis (Techletics '26) — Jan 2026
- Shortlisted, Smart India Hackathon 2025 (internal round) — Oct 2025
- Participant, Relay Coding, FOSS — Sept 2025
- Participant, LearnDeep - Deep Learning Training, CipherStream: Flow of Secure Communication, IEEE SB MITS — Sep 2025
- Java Springboot Course, iPlus Solutions — Sept 2025
- 3rd Prize, Micropresentation Competition — Aug 2025
- Participant, Hack@Home 2025 — Aug 2025
- Participant, UST GenCyS 2025 Conference — Aug 2025
- Artificial Intelligence, Introduction to Natural Language Processing, High Impact Presentations, Introduction to Data Science, Email Writing Skills, Time Management, Infosys Springboard — Completed June 2025
- Software Engineering Job Simulation, Accenture — June 2025
- Cyber Security Analyst - Job Simulation, Deloitte — June 2025
- Digital 101 – Foundational Tech Skills (30 Hours), Gold Category — Completed May 2025
- AI Overview, Computer Vision, Natural Language Processing, Document Intelligence & Knowledge Mining, Generative AI, AI Fluency, Microsoft Learn — Completed April 2025
- Python for Data Science, NPTEL – Elite Status — Completed April 2025
- SustainX – Sustainability Conference (Delegate), IGBC & CUSAT — March 2025
- Argument Arena – Debate Competition (2nd Place) — February 2025
- Student Enrichment Program – Robotics & IoT Workshop — November 2024
